SUPPLEMENTARY INFORMATION:

The Loop Parkway Bridge, mile 0.7, across Long Creek has a vertical clearance in the closed position of 21 feet at mean high water and 25 feet at mean low water. The existing drawbridge operation regulations are listed at 33 CFR 117.799(f).

The Meadowbrook Parkway Bridge, mile 12.8, across Sloop Channel has a vertical clearance in the closed position of 22 feet at mean high water and 25 feet at mean low water. The existing drawbridge operation regulations are listed at 33 CFR 117.799(h). Long Creek and Sloop Channel are transited by commercial fishing and recreational vessel traffic.

The bridge owner for both bridges, the State of New York Department of Transportation, requested bridge closures to facilitate a public event, the 2014 Dee Snider's Ride.

Under this temporary deviation the Loop Parkway and the Meadowbrook Parkway Bridges may remain in the closed position between 11 a.m. and 1 p.m. on September 7, 2014, to facilitate a public event, the 2014 Dee Snider's Ride.

There are no alternate routes for vessel traffic; however, vessels that can pass under the closed draws during this closure may do so at any time. The bridges may be opened in the event of an emergency.

The Coast Guard will inform the users of the waterways through our Local and or Broadcast Notices to Mariners of the change in operating schedule for the bridges so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
